

# Aaron Cockerill

Chief Strategy Officer

Aaron joined Lookout with nearly 20 years of software product management experience. As the Chief Strategy Officer, Aaron is responsible for developing, validating and implementing cross-functional strategic product initiatives that align with the Lookout vision of a secure connected world. Most recently, he served as VP of Mobile Technologies at Citrix, where he and his team were responsible for the development of Citrix's mobile apps and container technology, while driving the acquisition of Zenprise. Prior to working on mobile technologies, Aaron drove the creation of Citrix's desktop virtualization product, XenDesktop, which grew into more than \$1 billion yearly revenue for Citrix during his five years of leadership. Before joining Citrix, Aaron worked for Akamai leading product management on their enterprise content delivery solution as well as working on the development and deployment of many of Akamai's advanced content delivery networking technologies. Prior to that, Aaron led product management for OneSoft's e-commerce system, and he held multiple positions at BHP Billiton in Australia. He holds a BE Materials (Honors) from Wollongong University, Australia.
