

Aaron Cockerill

Executive Vice President of Product & Security

Aaron is the Executive Vice President of Product & Security for Lookout. A highly regarded technology executive with more than 25 years of experience, Aaron leads the Company's Product Management, Security and Threat Intelligence, Design and Experience, and Intellectual Property (IP) teams. Aaron has held a number of roles at Lookout in both Product Management and Strategy and most recently Aaron was Lookout's Chief Strategy Officer, where his responsibilities included the development, validation, and implementation of cross-functional strategic product initiatives.

Prior to joining Lookout, Aaron was Vice President of Mobile Technologies at Citrix. In this role, he and his team played a key role in developing Citrix's mobile apps and container technology, while driving the acquisition of Zenprise. Before venturing into mobile technologies, Aaron played a pivotal role in creating Citrix's desktop virtualization product, XenDesktop, which achieved more than \$1 billion in annual revenue during his five-year leadership tenure. Aaron's professional journey includes significant contributions to Akamai, where he led product management for its enterprise content delivery solution and played a crucial role in developing and deploying advanced content delivery networking technologies. Before Akamai, Aaron managed product development for OneSoft's e-commerce system and held various positions at BHP Billiton in Australia.

Aaron holds a BE Materials (Honors) from Wollongong University, Australia.
