

Lookout Data Security Platform

Enabling state and local government to achieve Zero Trust

Global Leader in Mobile Endpoint Security and Gartner Magic Quadrant Visionary for Security Service Edge (SSE)

In today's environment, security teams cannot trust users or devices that attempt to connect to their network, applications and data, even after they have authenticated. Instead, they must constantly verify the risk level to ensure that users or devices can be trusted. Organizations need strategies that meet modern-day security standards.

Lookout delivers a unified SSE platform for Zero Trust

The [Lookout Security Platform](#) consolidates your data security and SSE strategy into a unified platform while simplifying access management and compliance (i.e. PCI, PHI, HIPAA) across all your endpoints, clouds and on-premises infrastructure. With a single place to monitor risk and enforce security policies, you can protect your data from both external and insider threats or accidental data leakage.

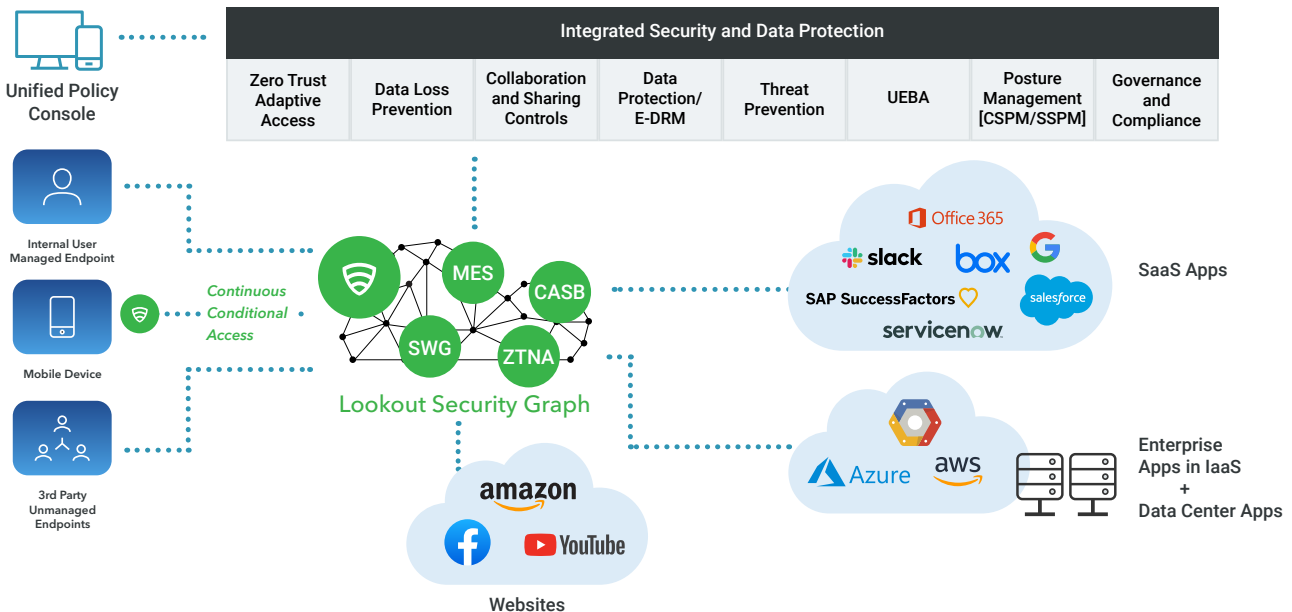

Lookout Data Security Platform

Take a data-centric, context-aware approach

Centralize policy oversight and enforcement

Ensure a consistent user experience from anywhere

By integrating our industry-leading mobile endpoint security (MES) and Security Service Edge (SSE) solutions, we enable organizations to deploy intelligent Zero Trust security that safeguards sensitive data without hindering productivity.

Lookout is the only SSE provider with an integrated Mobile Endpoint Security offering.

Cloud Access Security Broker (CASB)

Gain centralized visibility into and control over managed or unmanaged SaaS, IaaS and private apps and data. Achieve integrated Zero Trust access control, data protection, threat prevention and policy compliance across leading SaaS apps.

Zero Trust Network Access (ZTNA)

Enable users with secure remote access to apps in private clouds and inside data centers.

Mobile Endpoint Security

Secure against phishing, app, device and network threats across personal, managed, and unmanaged mobile devices.

Secure DNS

By continuously monitoring the web for malicious sites, Lookout delivers comprehensive protection against phishing attacks in real-time.

Secure Web Gateway (SWG)

We detect malicious websites in real-time, and when needed, block access to your employees, business and data.

Mobile Endpoint Detection and Response (EDR)

Query our app and device telemetry and search continuously updated results of our analysis of malicious and phishing websites.

Lookout Named a Visionary in 2021 Gartner® Magic Quadrant™ for Security Service Edge

About Lookout

Lookout is an integrated endpoint-to-cloud security company. Our mission is to secure and empower our digital future in a privacy-focused world where mobility and cloud are essential to all we do for work and play. We enable consumers and employees to protect their data, and to securely stay connected without violating their privacy and trust. Lookout is trusted by millions of consumers, the largest enterprises and government agencies, and partners such as AT&T, Verizon, Vodafone, Microsoft, Google, and Apple. Headquartered in San Francisco, Lookout has offices in Amsterdam, Boston, London, Sydney, Tokyo, Toronto and Washington, D.C. To learn more, visit www.lookout.com and follow Lookout on its [blog](#), [LinkedIn](#), and [Twitter](#).
