Secure BYOD with Lookout and Microsoft 365

About Us: Lookout Mobile Threat Defense

Lookout provides mobile security for businesses to protect their data from different threats while respecting employees’ privacy. Through integration with Microsoft Endpoint Manager, Lookout secures both managed and unmanaged devices by ensuring that only safe devices access any company data.

WHAT WE OFFER

Phishing protection
Lookout protects businesses from phishing attacks across any channel, such as SMS messaging apps and embedded URLs. What’s different about the Lookout approach is that it doesn’t rely on inspecting message content, therefore respecting user privacy.

App risk protection
Lookout app analysis technology is powered by intelligence from over 100 million iOS and Android apps, giving you visibility of malware that can exfiltrate data from the device, vulnerabilities in app data transfer and storage, plus any risky app behaviors that pose a compliance risk.

Device risk protection
Lookout creates a fingerprint of each mobile device and compares it against the nearly 200 million devices in our security platform to identify risks, such as behavioral anomalies, advanced root or jailbreak, out-of-date operating systems, and device configuration risks.

Network risk protection
By analyzing the connections from our global sensor network, false positives are effectively mitigated, while detecting high impact threats including man-in-the-middle attacks, host certificate hijacking, SSLStrip attacks, and TLS protocol downgrades.

WHAT OUR CUSTOMERS ARE SAYING

“We found Lookout to be the most mature solution throughout our entire evaluation, so we felt confident in our decision to go with the market leader.”

– Simon Hardy, Global Head of Office 365 Services and Enterprise Mobility

Microsoft 365

Microsoft 365 is a cloud-based subscription service that brings together the best tools for the way people work today. By combining best-in-class apps like Excel and Outlook with powerful cloud services like OneDrive and Microsoft Teams, Microsoft 365 lets anyone create and share anywhere on any device.

KEY USE CASES

BUSINESS-CLASS EMAIL
Build anything from lightweight websites to multitier cloud services that scale up as your business grows.

CLOUD STORAGE
Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

MEET ONLINE
Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

COLLABORATE AND CHAT PRIVATELY
Accelerate your mobile app development by using a backend hosted on Microsoft Azure.

WHY MICROSOFT 365?

Save your company money
Microsoft 365 is available as a simple monthly subscription. Avoid large up-front costs for new software while moving the cost of IT from capital to operating expense. And without on-premises servers to run email, websites, and document storage, you can reduce energy costs and save by no longer purchasing new server hardware.

Scale your business quickly and flexibly
Microsoft 365 grows with you on the Microsoft Azure cloud. Adding a new user is as simple as buying an additional license, which allows access to business-critical technology on as many as five PCs/Macs and five mobile devices. Microsoft 365 provides an array of plans to fit the right capability needs and price points for every user in your organization.

Technical support
Your Microsoft 365 subscription comes with 24/7 support from a global network of experts, with one-hour response for critical, service-impacting events.

Financially backed SLA
Get peace of mind knowing that your services are available when you need them with a financially backed, 99.9 percent uptime service level agreement.

Simplified IT management
Reduce headaches by reducing your IT infrastructure. Content lives safely in globally distributed data centers with continuous backup and disaster recovery abilities.
